# E-learning policy : phase I

## Top-down phase (2004-2007)

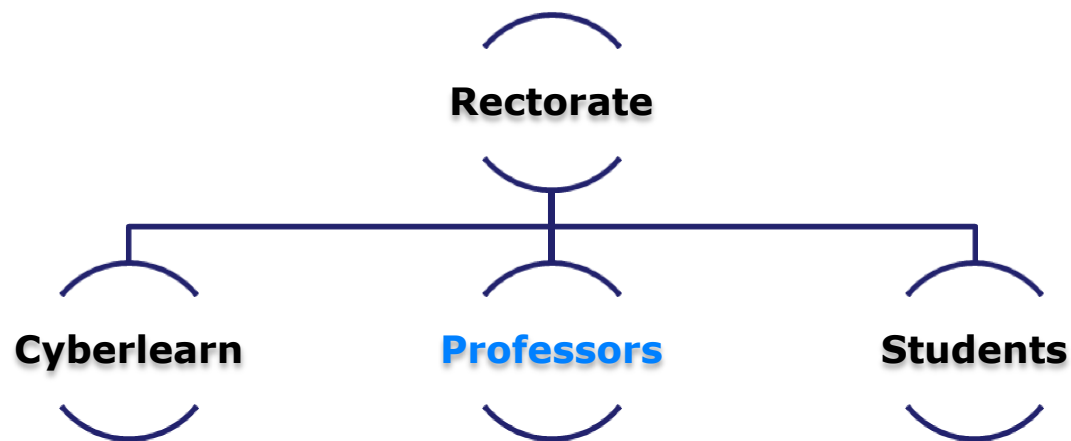

650 courses by 2007

# E-learning policy : phase II

## First Phase bottom-up (2008-2011)

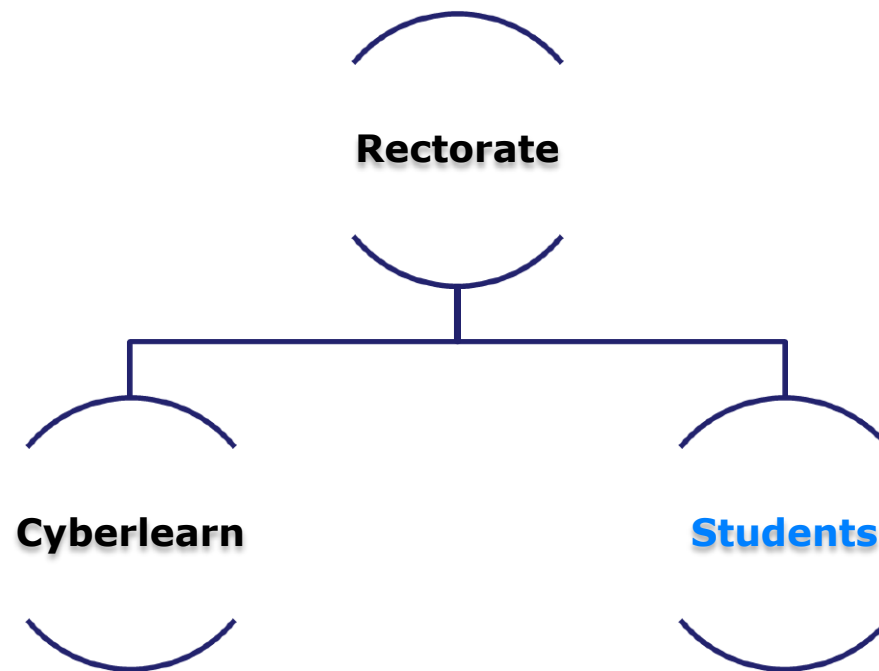

2500 courses by 2011

# E-learning policy : phase III

## Seconde Phase bottom-up (2011-present)

+4000 courses by 2013

# Survey

**SAMPLE SIZE CALCULATOR**

Confidence level:  95%  99%

Confidence interval:

Population:

*(leave blank if too large of a number or if number is unknown)*

Sample size needed:

800 entries

# Survey May 2013

52% women, 48% men

80% 18-25 years old

86% on FB

76% use a  
smartphone  
During classtime

87% have a smartphone

20% a ipad-like tablet

3% a e-reader

One of my communication class in computing section looking at colleagues' realizations

# In general, they use technology to :

- check their e-mails
- use social media
- game
- chat
- listen to music
- log on Cyberlearn platform
- do research for their courses
- read news and sports information
- watch TV shows,
- buy clothes
- surf on video websites or watch live TV
- only 1.5% never goes on Internet

Is A.  
really working?  
#smilingattheoutsideworld

# During classtime, they use technology to :

Kevin seems to do something else  
#underthetable

85% of them access the Internet during the course

15% who do not

46% access the Internet because their professor uses the Internet during the course

29 % check on data showed by the professor

49% seek data to supplement data provided by the professor

68% read their e-mails

47% browse the Internet

32% admit being bored by the course

28 % like doing several things at the same time

*“Sometimes, browse the Internet or check e-mails help to progress on other projects. Moreover, it could be useful to take notes on Google drive and then share.”*

*“I cannot stop myself from going on the Internet for a day, it's really part of my daily life.”*

*“The Internet prevents me from being 100% in this course ... Having access with a single click to all information related to what professor says, makes me less attentive. But it is an illusion because you don't keep anything of what you read on the Internet.”*

*“If attendance is mandatory, but the course is too simple or boring, I do another job (or my student job) on my laptop!”  
on the Internet for a day, it's really part of my daily life.”*

*“when the course is particularly uninteresting I quickly digress”*

*“I cannot stop myself...”, “The Internet prevents me from...”, “ it makes me less attentive..”*

# The use of smartphones

Communicating  
#ubiquitousworld

75 % use their smartphone during lecture

29 % frequently

46 % sometimes

57 % they check SMSs

49 % chat on an instant messaging app such as whatsapp

48% check their e-mails

26 % go on Facebook or read breaking news

25% browse the Internet or use a mobile app

10 % read sports scores or tweet (4%)

Some add comments: “I game”, “I calculate”, “I verify vocabulary”, “I translate words”, “I game” and one even admits to accessing dating sites.

# Expectations /1

Working in group on a real project  
#putusatwork

Only 37% would like to use their smartphone during lectures to help them learning

56 % would like to listen to theoretical elements and immediately afterward do exercises under professorial supervision

Only 18% would like to experience flipped-class

22 % would like theoretical lectures without practicing at all

# Expectations /2

L. troubled by his professor during classtime #whatdouwand

55% wish to **watch more videos**

47% want quizzes

46% would like simulations

40% would like **video-podcasted courses**

31% would like more mobile applications

30% **serious games**

21% would appreciate the availability of wikis

20% would like **audio-podcasted courses**

9% wish to use blogs

# e-learning future orientation

Help professors making their courses more interactive

Quizzes, instant polls, mini videos

Develop mobile apps to be used outside the classroom

Google m-drill and try it

Implement some serious games

Google gademavo and try it

Realize a MOOC as a pilot based on video

# The end of the story

"I'd like to attend the kind of course where time flies and to which I can say "wow" rather than "ehmm""

Reading a newspaper during classtime  
#atleasttheyread
